

# UI Demo Explain

- Scan Farm
- The Scan Farm demo shows the drone doing some passes up and down the farm to scan it.
- When it reaches the end of a pass it then moves to the left or right depending on if the pass is up or down. After that it then makes a 180 and does another pass.
- After all passes are done it then returns to the command center.
- Launch drone
- Launch drone allows the user to select a pane to go to.
- Once the drone has reached that pane it then does a 360 and hovers in place for 10 seconds.
- After the 10 seconds is up the drone then returns back to the command center.
